Education

Texas A&M University, College Station, Texas Student, Incomplete — *January 2017 - December 2019*

Completed 77 hours towards a Electrical Systems Engineering Technology major.
I intend to complete my education in Computer Science, though not at Texas A&M.

- Technical Support Fundamentals - Coursera July 2019
- Summa Cum Laude - CyFair High School 2016

Experience

Astro Core Maintainer — *July 2021 -*

<https://astro.build> — Contributed docs, user experience improvements, and general project guidance to the Astro project. Based on previous experience w/ Hugo and Rust, I helped Astro be a helpful and enjoyable tool with a great community.

College Music Freelance Web Developer — *July 2020 - March 2021*

<https://live-collegemusic-co-uk.netlify.app> — Worked on a dynamic, user-accessible, and responsive standalone site for the lo-fi streaming company College Music. Integrated Spotify API with the <https://odesli.co> API to create a song search to song link API custom for the app. Used AlpineJS, Nunjucks, and 11ty to deliver a SPA that intends to be lighter-weight than a standard all JavaScript SPA.

G-Power Freelance Web Developer — *March 2020 - March 2021*

<https://getgpower.com> — Originally a WordPress site serving 6MB on the homepage, the rewrite weighed only 308KB, was fully responsive, and was accessible for every customer of G-Power. It also used AlpineJS to allow for a responsive menubar. The site used minimal JS to improve loading times and accessibility. Contact for reference, company is no longer solvent.

TAMU Collegiate Content Creatives One-Off Project for College Club — *September 2018*

<https://tamuccc.netlify.app> — Created a continuously delivered static landing page for my college club.
